SCARLET SIM—The color ranges from an intense scarlet at the base of each petal to white on the margins. The color deepens during the dark part of the year.

A — \$15.00 B — \$12.50 C — \$10.00

GAYETY—White with bright red pencil markings. The most stable of the variegated Sim sports.

A — \$15.00 B — \$12.50 C — \$10.00

Mr. Carnation Grower:

Isn't it a pleasure to see the way Mr. & Mrs. John Q. Public keep coming back for more and better carnations? They have learned by experience that carnations have everything—color, fragrance and lasting qualities. Doesn't it make good sense to grow what the public is asking for?

However, to make a profit it is necessary to produce top quality and maximum quantity. Only by planting strong, healthy rooted cuttings and following the best cultural practices can a carnation or any crop be made to pay off. We are ready to supply just that kind of stock at the lowest possible price.

Like the cut flower market the demand for cuttings is much higher at one time than another although the supply is fairly constant. In order to adjust the supply and demand we are offering a 10% DISCOUNT ON ALL ORDERS FOR NOVEMBER AND DECEMBER DELIVERY. Here is your chance to make a considerable savings.

What are you going to do with them at this time of year? Plant carnations after your normal season mum crop and run for a year and a half. This will give you a spring crop when you need them most and go into the next season with strong producing plants. Two beds planted in alternate years with mums for six months and carnations for eighteen months make an excellent rotation.

Send your order at once for November or December delivery at 10% off or for later delivery and be sure of your supply. Don't forget an additional saving of 5% can be made by sending cash with the order in the enclosed envelope.

Yours for a bigger and better carnation year.
